About your Wireless Presenter

- The maximum range is 60 ft (18m) between the receiver and the remote.
- The receiver has a single light indicator with 2 colors, green and red. For every button press of the presenter, the receiver LED quickly flashes green to indicate that the battery level is good. The LED will flash red on every button press if the battery level is low.
- The Wireless Presenter should work up to one year with the batteries that come with it. This is based on average usage. To extend battery life when not in use, be sure to turn off the remote by inserting the receiver into the remote.
- Always replace the batteries in sets, using the same age and brand of batteries.
- Always dispose of batteries properly.
